SUMMARY

Full-stack developer with **nearly 3 years** of experience building scalable web applications across React, TypeScript, and Python backend microservices, with **AI integration experience** in **NLP** model development and RAG-based system design. Combines solid technical execution with product-oriented thinking and shipping features. Comfortable owning decisions across the full stack, from architecture selection to deployment, and thrives in **fast-paced, product-driven environments**.

WORK EXPERIENCE

• STUDENT AI RESEARCHER

George Brown College, Canada, Oct. 2025–Dec. 2025

- Researched and compared 8+ **usability testing tools** and open-source **SLMs** to support the technology evaluation.
- Maintained project **documentation** and system diagrams to **align cross-functional teams** on RAG/XAI architectures.
- Validated a usability testing system integration feasibility, compatibility, and schema integration across client platforms.
- Integrated a **no-code chatbot UI** into the client's **React + TypeScript** architecture, isolating state via clean abstraction.

• SOFTWARE DEVELOPER

MIRLE Automation Corporation, Taiwan, May 2022–Oct. 2024

- Engineered a **customizable dashboard** with **dynamic styling and data sources**, cutting user decision time by 70%.
- Streamlined codebase through **disciplined code reviews** and **refactoring**, cutting redundancy by 50%.
- Built **reusable components** using Vue + TypeScript to standardize UI development, accelerating feature delivery by 25%.
- Standardized documentation & **impact assessments** unify cross-team workflows, shortening development time by 30%.
- Developed backend Python APIs enabling **real-time data** sync across **microservices**, eliminating manual reconciliation.

• LIGHTING DESIGNER → DESIGN TEAM LEADER

Taiwan, China, 2018–2022

- Delivered visual & spatial design and was promoted to lead a team and **turn vague requirements into actionable plans**.

• INTERNATIONAL WORK EXPERIENCE

Australia, 2020–2021

- Collaborated with diverse teams, developing **cross-cultural communication and rapid adaptability skills**.

• EARLY DESIGN & CREATIVE ROLES

Taiwan, 2017–2018

- **Human-centered** creative work building user empathy and visual design fundamentals.

KEY SKILLS

Frontend/Backend: React.js, Vue.js, TypeScript, JavaScript, Node.js, Python, Django, Flask, REST APIs, ASP.NET, and C#.

Database/DevOps: PostgreSQL, MySQL, MongoDB, Redis, Git, CI/CD, Docker, AWS, SonarQube, Linux.

AI Integration: RAG, NLP, LLM, Hugging Face, PyTorch, TensorFlow.

PROJECTS

• LOST AND FOUND MANAGEMENT SYSTEM

George Brown College, Jan. 2026–Apr. 2026

- Designed **RBAC-based security architecture** to manage access across 3 user roles, ensuring secure system access.
- Configured and deployed independently a three-tier **cloud architecture with CI/CD**, reducing release effort by 90%.
- Co-developed **backend APIs** and achieved a 96% **test** pass rate across 35 test cases with 0 critical defects remaining.

• DeepHeart AI-BASED EMOTION TRACKER

AI Application Development Bootcamp, Jan. 2022–Mar. 2022

- **Proposed and led development** of an AI-powered emotion detection product **from concept through implementation**.
- Addressed inaccurate Traditional Chinese sentiment analysis by **fine-tuning** BERT, achieving 75-80% 3-class accuracy.
- Resolved noisy text using a **data preprocessing pipeline**, boosting accuracy by 20% across 29,000+ samples.

EDUCATION & CERTIFICATIONS

Ontario College Diploma of Computer Programming

George Brown College, Jan. 2025–Apr. 2026

AI Application Development Bootcamp

Taiwan Government-Funded, Nov. 2021–Mar. 2022

UI/UX Interface Design Course

Taiwan Government-Funded, Mar. 2021–Jun. 2021

Bachelor of Art and Design

National Dong Hwa University, Sep. 2013–Jul. 2017
